

Alexander D. Steele

ashimzed.github.io | (623) 249-0713 | alexander.steele.2014@outlook.com

Computer Science student deeply committed to technology and exceptional problem-solving in both theoretical and practical realms. Eager to apply and further refine skills through real-world applications.

TECHNICAL PROFICIENCIES -

- | | | |
|----------|----------------------|---------------------------|
| • Python | • MS Excel | • SQL (Postgres & SQLite) |
| • C++ | • Java (Spring Boot) | • Git + GitHub + GitLab |
-

PROJECTS -

Optimal Package Delivery Routing for "WGUPS" | Python

- Developed Python app to optimize package delivery routes, adhering to time constraints and minimizing distance
- Utilized Dijkstra's algorithm for shortest-path calculations based on a distance matrix
- Created custom classes Address, Inventory, and Truck for encapsulating delivery nodes, package management, and vehicle status
- Enabled dynamic updates to delivery requirements such as time constraints and address changes
- Implemented real-time package status look-up function for supervisors
- Documented code extensively, following industry-standard Python style guidelines

Dynamic Rental Frequency Reporting System | SQL

- Engineered a dynamic reporting system using PostgreSQL to analyze film rental frequencies based on their MPAA ratings.
- Implemented advanced SQL techniques, including triggers, stored procedures, and custom functions, for real-time data updating.
- Designed the system to continually refresh summary data, enabling actionable insights for inventory and marketing decisions.

Portfolio Website Powered by Webflow | ashimzed.github.io

- Designed a responsive portfolio to showcase professional journey
 - Implemented custom modifications post-export for personalized touches
 - Leveraged Git for version control and hosted on GitHub Pages for global accessibility
-

RELEVANT EXPERIENCE -

IT Contractor | Intech Southwest

May 2023 - present

- Deliver specialized technical support and guidance to a diverse range of clients, ensuring their IT systems function smoothly and efficiently
 - Collaborate closely with clients to decipher their specific needs, and tailor IT strategies to meet and exceed those requirements
 - Leverage software such as Jamf for device management
 - Configure database for project-specific inventory
-

EDUCATION -

Western Governor's University
Bachelor's in Computer Science
Expected Graduation: Dec 2023

RELEVANT COURSEWORK -

- | | | |
|-------------------------------|------------------------|---------------------------|
| • Advanced Data Management | • Back-End Programming | • Version Control |
| • Discrete Mathematics I & II | • Java Frameworks | • Technical Communication |
-

OUTSIDE INTERESTS - Culinary Arts, Fitness, & Continuous Learning
